FLY TYING

superFLY™

WELCOME TO SUPERFLY

THE BEGINNING

Superfly started with a good idea and a passion for fly tying in a small basement hobby room more than 25 years ago. Today, Superfly has grown into an internationally respected company and one of North America's leading manufacturers and distributors of fly tying and fly fishing products.

THE PRODUCTS

Our facilities and in-house expertise allow us to create innovative and effective new products and the flexibility to respond rapidly to industry changes and trends. Our product line includes fly rods, reels and accessories; fly lines, leaders and tippet material; premium quality flies; and one of the largest selections of fly tying materials and tools on the market.

With over 7,000 products, Superfly offers a comprehensive program for a single sourcing solution that simplifies the art and science of fly fishing and fly tying.

We produce products for the fly tyer with big ideas and the fly fisher who wants to land "the big one".

Stillwater SOLUTIONS

Developed by Brian Chan & Phil Rowley, Stillwater Solutions™ is a complete line of fly fishing and fly tying products designed to meet the specific needs of lake fly fishers everywhere. The program consists of flies and fly tying materials with a companion recipe book and DVDs. All products have been thoroughly researched and designed for success.

The Stillwater Solutions™ range of fly tying materials is the culmination of many years of experience on stillwaters. The products have been carefully chosen to provide a full spectrum of options for lake fishing everywhere. Look for the Stillwater Solutions™ logo identifier throughout the catalog.

THE SUPERFLY ADVANTAGE

Global sourcing and long-term contracts with key vendors secure our delivery commitments. Our quality control is second to none and is carefully managed through every step from manufacturing to fulfillment. Each product is inspected before we put our name on it.

We pride ourselves on our industry-leading fill rates and on-time order delivery so that Superfly products are always on the shelf.

THE BIG PICTURE

Superfly is dedicated to the preservation and growth of the art of fly tying and the sport of fly fishing through our ongoing support of environmental conservation efforts and educational programs. We proudly contribute to our communities by supporting local and national organizations who share these same goals.

Finally, Superfly International is a family-run business that respects every member of our growing circle of employees, suppliers, retailers and consumers worldwide.

LET US BE YOUR GUIDE . . .

Genetic Hackle

GENETIC ½ CAPES

Each Genetic ½ Cape contains a range of hackle. Feathers on the upper section of the cape are ideal for dry flies and small streamer wings. Feathers from the lower sections are wonderful for creating beards, matuka wings, wooly bugger hackles, tail hackle, streamer wings and tails on large pike and bass flies.

GENETIC COMBO CAPE SET

The Genetic Combo Cape Set consists of the two most popular colors for genetic hackle. Each package contains a half cape each of natural brown and grizzly. The combo is the perfect selection for popular flies such as adams, mosquitoes, stimulators and march browns.

Brown & Grizzly	GCC-00

GENETIC ½ SADDLES

Genetic Saddles have lots of slender dry fly feathers as well as a section of softer webby feathers. The hackle is great for creating distinct lateral lines on pike and saltwater fly patterns and can be used as a dry fly wing on traditional hackled flies. The softer webby feathers can be utilized to create soft hackle collars, beards, throats, matuka wings and tails.

BUGGER STREAMER PACK

A patch selected from the bottom of the cape, these are the feathers tyers want for long featherwings on streamers and for palmered hackles on wooly buggers.

Black	BPD-12	Grizzly	BPG-00
Brown	BP-03	Grizzly/Olive	BPD-08

DRY FLY PATCH

This patch contains the smaller dry fly hackles from the top of the cape and because they are still on the hide, are easier to size to the appropriate hook.

Brown & Grizzly	DFPC-00

Chinese Cock & Hen

CHINESE COCK CAPES

Cock Capes feature long, broad feathers available in a huge variety of natural and dyed colors. Each cape has feathers suitable for dry fly hackles, streamer wings, palmered hackles, collars and dry fly wings. The stiff fibers make great hackle beards and tails.

Indian Cock & Hen

INDIAN COCK CAPES

Also referred to as "Dry Fly Rooster Necks", Indian Cock Capes provide good hackle for dry flies. The barbs on the feathers are stiff and lend themselves well to tails, beards and collars. The hackles may also be used for streamer wings and palmered flies. These capes have an amazing range of natural coloration.

NATURAL			
Badger	IC-06	Red Brown	IC-03
Ginger Variant	IC-08	White/Cream	IC-10

INDIAN HEN BACKS

Indian Hen Backs have excellent feathers for tying small collars, soft hackles and matuka flies. The feathers are rich in natural pattern and mottling to create realistic looking tails, fins and legs on minnows and nymphs.

Assorted Mottled	IHB-00

Hackle

STRUNG NECK HACKLE

Neck Hackles have large wide feathers that make them an ideal choice for tails on dry flies, streamer wings, bass flies, and saltwater patterns. The hackles are strung together for convenience in selecting the right feather. Standard Neck Hackle is 4 to 5 inches in length (100 to 127 millimeters). Premium Neck Hackle is 5 inches or longer in length (127 millimeters).

Duck

PETITJEAN CUL DE CANARD

Marc Petitjean knows the secret of good fly tying is using high quality materials. That's why he developed his own brand of CDC, which is quickly earning the reputation as one of the best in the world. He has perfected the washing and dyeing processes to protect the fine structure and oils of the delicate CDC feather. These extra-long, premium feathers have been hand selected for quality.

Fl. Green	PCDC-12	White	PCDC-05
Fl. Red	PCDC-11		

CUL DE CANARD

Cul de Canard, or CDC, as it is commonly referred to, is a finely-fibered duck feather with unique floating capabilities. French for "Duck Bottom", CDC is buoyant due to its natural oils and does not require additional floatants. CDC is often used for tying emergers and dry fly patterns. It can be stacked and tied in as a wing; tied in by the tips and palmered, used as a soft hackle feather; spun into dubbing loops or used as a dubbing material.

Note: When using floatants on patterns utilizing CDC, be sure not to apply it to the CDC plume, as this will counteract its natural buoyancy.

MINI PUFFS

White	MCDC-10

DUCK QUILLS

Duck Quills are most often used for wings and tails on wet flies. Equal sized slips of quill are cut from a left and a right side feather and tied in together to create a classic wet fly wing. Quills of different or contrasting colors can be married to create unique combinations such as the classic "Trout Fin", a combination of white, black and orange.

Goose

GOOSE QUILLS

The natural slate grey of Canada Goose Quills closely imitates mature nymph wing cases.

Canada Goose - Primary	GQ-00
Canada Goose - Secondary	GQ-01

GOOSE BIOTS

Biots are the leading edge of the flight quills of large birds. They have a sharp taper and are often used on nymph patterns such as the prince nymph. Goose Biots can be used to create tails and wings on nymphs, spines on stickleback patterns and pincers on hellgrammite patterns. Biots can also be wound onto a hook shank as a body material on small dry flies and midges, creating an interesting segmented body.

GUINEA HEN SKIN

Guinea Fowl plumage is famous for its polka dot pattern of white spots on a black base. The full skin offers additional contrasting patterns. The smaller cape feathers have distinct white speckling interspersed with the dots and the spots on the wing quills transition to oblongs and finally to long bars. The strong contrast in markings makes this one of the most versatile materials for successfully attracting fish.

STRUNG MARABOU

Marabou is ideal for creating leeches, damselfly nymphs, dragonfly nymphs and minnow imitations. When wet, it gives a realistic wiggle to your patterns. Extremely versatile, Marabou can be used for tails, wings, collars or beards and is a key material in many steelhead, trout and salmon patterns. It can also be used as a dubbing or tied in by the tips and wound forward as a body material.

FEATHERS & PLUMAGE

Partridge

HUNGARIAN PARTRIDGE

Hungarian Partridge Plumage is highly revered as a versatile material to fly tyers. The light speckles, barring and small size of the feathers, make it an ideal material for imitating legs, tails and shellbacks. Partridge is widely used in the assembly of soft hackles, spiders and nymph patterns. The fibers are perfect for creating natural looking legs, wing cases, collars and tails on nymph patterns. The feathers can be incorporated into dry patterns as wings and tail materials.
Subject to availability.

Hungarian Complete Skin	HPS-00
Hungarian Partridge Plumage	HPP-00

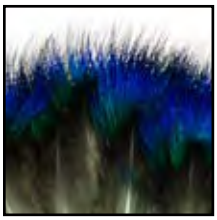
Peacock

PEACOCK GOLD BODY FEATHERS

Peacock Gold Body Feathers have a brilliant iridescence and a scallop-shaped tip. They are used for cheeks and shoulders on many streamer patterns and Atlantic salmon flies. The gold plumage can be used to create tails, soft hackles, nymph legs and wing cases. (10 /pkg)

Gold Body Feathers	PCG-00

PEACOCK BREAST



Brilliant, iridescent blue feathers can be used as a natural substitute for blue jay feathers. (10/pkg)

Blue Breast	PCB-00

PEACOCK EYES

Add a tint of color to nymphs and herl-bodied flies. Dyed Peacock Eyes can be used anywhere you use herl. Strip off the herl to create colored quills for tying dry flies, midges and chironomid bodies. Peacock Eyes have a more intense range of iridescent colors and shorter barbs than herl found lower on the stem. (2 /pkg)

PEACOCK EYE STICKS

Peacock Eye Sticks are the full plume from the Peacock tail, complete with eye and plenty of herl. Many tyer's consider this the best value for Peacock Herl.

30" LENGTH	***2 /PKG***	***10 /PKG***
Natural	PCES-00	PCES-01

PEACOCK HERL

Peacock Herl is an essential material used in numerous patterns. Dark blue-green iridescence naturally imitates the iridescence found in many insects and is commonly used as a body material. Peacock Herl can also be used as an overwing, tail or collar on many wet patterns or as an overwing on baitfish patterns to imitate the darker back.

	STANDARD 5" - 7"	***LONG 10" - 12"***
Natural	PCH-S	PCH-L

PEACOCK SWORD

Peacock Sword has a brilliant green iridescence. Sword fibers are most commonly used to create tails on trout, bass, and salmon flies. They can also be used as a wing like on the classic alexandria wet fly or as an overwing on saltwater patterns. (2 /pkg)

Sword	PCS-00

PEACOCK QUILL WINGS

The quill is one of the only peacock feathers that is not dressed in iridescent green. The quill is a tan color and has rich mottling throughout. Peacock Wing Quills are used to create married wings and tails on Atlantic salmon flies. They make a great substitute for Mottled Turkey Quill. (2 /pkg)

Mottled Wing Quills	PCQ-00

Pheasant - Blue Eared

BLUE EARED PHEASANT

With its natural dark dun coloration, Blue Eared Pheasant has been long revered as a substitute for heron spey hackle and spey cock and is now the standard on many spey and dee fly patterns. The feathers are most often tied in by the tip, palmered forward and stroked to the bottom, leaving the longer fibers at the eye of the fly. This gives the fly a beautiful tapered look. Each package contains an assortment of feather sizes to tie a variety of fly sizes.

Mixed Body Plumage	EP-00
Full Skin (please call for availability)	

Pheasant - Golden

GOLDEN PHEASANT SKINS

The complete skin provides a selection of the many different feathers and naturally diverse color range of plumage. Golden Pheasant Skins include red, yellow and green feathers. The complete tippet neck and golden crest are included, along with the wings. The complete skin provides a convenient, broad selection of plumage all in a single package.

Skin with Head, no Tail	GPS-00
Skin Only, no Head no Tail	GPS-01

GOLDEN PHEASANT HEADS

The head of the Golden Pheasant includes complete sections of both tippet feathers and crest feathers. Golden Pheasant Crests are essential to many disciplines of fly tying. The crests are naturally golden yellow, often accented with a scarlet tip. Tippets are widely used as a tailing material in many dry fly patterns and also used in the shoulder section of many New England streamers.

GOLDEN PHEASANT CRESTS

Golden Pheasant Crests are essential to many disciplines of fly tying. Classic salmon flies and New England streamers often employ long crests as tails and topping. Shorter crests are often used to create tails on wet flies. The crests are naturally golden yellow, often accented with a scarlet tip. Dipping them into hot water and placing them on a curved surface to dry will reshape the crests. Available in packages of 10 crests or a complete crest.

Pheasant - Ringneck

RINGNECK PHEASANT SKINS

Ringneck Pheasant is the most popular pheasant for fly tyers. The range of feathers available on each skin allows tyers infinite options for patterns. The small white "Ringneck" feathers can be dyed to represent a number of exotic hard to find feathers such as blue chatterer, toucan, indian crow and kingfisher. Barred wing quills are great for wet fly patterns and hoppers. The long-fibered rump feathers are used for many patterns. The iridescent blue-green neck feathers are ideal for creating soft hackle flies. *Tail not included.*

Pheasant - Ringneck continued

RINGNECK PHEASANT HEN SKINS

The smaller feathers of the Ringneck Hen Pheasant are great for tying nymphs, emergers and soft hackles. The body plumage has an ideal mottled pattern that is perfect for creating legs, tails, collars, wing cases and pads on nymphs. The feathers wrap beautifully to create suggestive soft hackle flies and collared nymphs. The Ringneck Hen Pheasant is the textbook substitute for Hungarian Partridge. *Tail not included*.

Skin with Head, no Tail	RPHS-00

RINGNECK HEN TAILS

Short-fibered with less pronounced markings than the male Ringneck Pheasant, these Hen Tails have very subtle coloration.

Complete Tail	RPHT-00

Pheasant - Silver

The black chevrons on Silver Pheasant feathers make an illusion of motion when tyed in as cheeks on streamers and salmon flies, and are perfect for "killer" style imitations. The body plumage also makes a fantastic collar hackle on minnow patterns, and the wing quills have strong black markings which provide phenomenal contrast.

Skin Only, no Head or Tail	SPS-00
Body Plumage	SPB-00
Wing Quills	SPQ-00

Schlappen

STRUNG SCHLAPPEN

Schlappen are long heavily webbed hackles from the base of the rooster saddle. Schlappen is ideal for collars on steelhead and salmon flies. It can also be used for tails, legs, palmered hackle, spey hackle, beards, throats and wings. The softer Schlappen feather fibers move easily in the water. When wrapped as a collar, they flow back naturally over the fly.

Badger

BADGER BODY FUR

Badger has a natural soft flowing motion when pulled through the water. Use for collars on tarpon, pike and bass flies or a wing on Clouser minnows. The long guard hairs make perfect mayfly tails or caddis antennae. The soft underfur makes a great dubbing on its own or when mixed with other materials.

Natural Body Fur BAD-00

Bear

BLACK BEAR

Black Bear Body Hair is coarse, thick hair perfect for hairwing salmon flies and essential to patterns such as the black bear red butt and green butt as well as the undertaker. The thick hairs are great for tails on nymphs and mayflies, caddis wings and streamers.

**Not available for export to certain countries.*

Natural Body Hair BB-00

BROWN BEAR

Brown Bear is great for hairwing streamers, salmon and trout flies. Hairs are straight with a bit of a wave and similar to polar bear without the translucence. The Brown Bear underfur also makes a great dubbing for larger nymphs, caddis flies and stoneflies.

**Not available for export to certain countries.*

Natural Body Hair BRB-00

POLAR BEAR

There is no substitute for the natural sheen and translucence of Polar Bear. It can be used as a substitute in patterns calling for bucktail. Polar Bear underfur is coarse and wiry and is a great dubbing for larger nymphs, steelhead and salmon patterns.

**Not available for export to certain countries.*

DYED

Assortment - Dyed Pieces	PB-AST2

Beaver

BEAVER

Beaver underfur is extremely dense, soft and fine, making it perfect for dubbing onto thread. Beaver's natural water shedding properties make it a great choice for dubbing bodies on dry flies. It can be used on its own or mixed with other furs and synthetics to create unique blends. The guard hairs make first-rate tails, wings and antennae on dry flies.

Natural Fur BV-00

Calf

CALF BODY HAIR

Calf Body Hair can be used in place of Calf Tail. The body hairs are naturally more even than tail hair, and as a result, do not usually need stacking. Use Calf Body Hair for chironomid breathers, spinner wings, tails, parachute posts, Wulff wings and trailing shucks.

NATURAL

FUR & HAIR

Moose

MOOSE BODY HAIR

Great for extra large dry flies, Moose Body Hair can be spun and clipped to create bass bugs and floating pike flies. The stiff dark tips of Moose Body Hair make it an excellent material for use in dry fly and nymph tails.

Natural Body Hair MBH-00

MOOSE MANE

Moose Mane has extra-long hairs and is a mixture of colors. The hairs range from white to dark dun to black. The hair can be stacked and used as a hairwing on long streamers, as a tail material or wrapped as a quill body substitute on dry flies such as the mosquito.

Natural Mane MM-00

Muskrat

MUSKRAT BODY FUR

Due to its natural water-shedding properties, the grey underfur of the Muskrat is the original adams body dubbing. The longer, soft guard hairs are excellent for antennae, tails and legs for both dries and nymphs.

Mixed Back and Belly Pieces MUSK-00

Otter

OTTER BODY FUR

A natural water-repellent dubbing for dry flies, Otter Body Fur has short guard hairs ideal for blending with the underfur for a spectacular spiky dubbing. Otter is brown/grey in color and the guard hairs are slightly translucent. The patches can also be cut into strips for use in zonker style applications.

**Not available for export to certain countries.*

Natural OTT-00

Rabbit

HARE'S MASK WITH EARS

Hare's Masks offer a wide variety of hair types. The top section has short spiky guard hairs with little underfur making it great for adding to dubbing for a buggy, natural look. The bottom section is great for longer dubbing mixes and has more underfur. Whiskers can also be used for realistic looking mayfly tails and caddis antennae.

Natural Hare's Mask HM-00

SNOWSHOE HARE'S FEET

Hare's Feet have wonderful characteristics that make them a perfect material for tying flies. The coarse guard hairs are buoyant and can be stacked as wings and tails for caddis and mayfly patterns without creating a lot of bulk. The translucent underfur makes a great dubbing. Popular patterns include Fran Better's usual and the snowshoe caddis.

NATURAL (PAIR)

Cream/Grey	RF-01

DYED (PAIR)

Black	RFD-12	Dark Grey	RFD-38
Brown	RFD-21	Olive	RFD-08

RABBIT FULL SKINS

Rabbit makes excellent dubbing. The hair can be mixed with other natural and synthetic materials to produce unique dubbing mixtures. The hides can also be cut lengthwise for zonker strips or cut across the grain of the hair to make crosscut strips.

RABBIT STRIPS

Rabbit fur on the hide is one of the best materials to use on streamers and sub-surface flies due to its exceptional life-like movement in the water. Rabbit Super Strips are cut in 3/8" widths for larger flies. Zonker Strips are 1/4" wide. Cross Cut Rabbit Strips are 1/4" wide and are cut perpendicular to the grain of the hair, making them great for creating palmered rabbit bodies. Zonkers, flesh flies, double bunnies and sculpins are just a few patterns that incorporate the use of rabbit.

Raccoon

CANADIAN RACCOON BODY FUR

Canadian Raccoon contains a mixture of long stiff guard hairs and dense dun colored underfur. The underfur is a superb dubbing for nymph and emerger patterns. The long guard hairs are ideal for hairwing patterns. Hairs have black tips with a cream colored base.

Natural Body Fur	RAC-00

Ram

RAM'S WOOL

Ram's Wool is very dense and fuzzy. The wool is often used to sculpt heads on minnow imitations such as muddler minnows and sculpins. Ram's Wool is spun onto the hook shank in the same manner as deer hair and then trimmed to shape. Because it is not buoyant, it is perfect for patterns fished in deeper waters.

FUR & HAIR

Squirrel

SQUIRREL TAIL

Squirrel Tails have long been used to create salmon flies. Patterns such as the rusty rat, laxa blue and cosseboom all use Squirrel Tail for the hairwing. Squirrel Tail can also be used to create wings and tails in patterns like the steelhead bee. The natural variegated markings on the tail create a great shellback for scud and backswimmer patterns.

SEAL FUR DUBBING

Seal Dubbing has a great natural translucency and shine. Seal is the ultimate material for producing the translucent effect that makes so many patterns effective. The vibrant colors work well on steelhead and salmon patterns. Its natural ability to repel water makes it a good choice for dry flies and its ability to trap bubbles works great for submerged patterns. **Not available for export to certain countries.*

IMI SEAL DUBBING

This synthetic, reflective dubbing is the perfect substitute for natural seal. It is the most reflective fiber we have found. It can be used as a dubbing enhancer when mixed with natural dubbings. Imi Seal is not quite as stiff as natural seal, making it easier to dub. With its vibrant colors Imi Seal makes a great dubbing for use in salmon and steelhead patterns.

CRYSTAL CHENILLE

Crystal Chenille adds attraction and flash to streamers and egg patterns and can be replaced in any pattern recipe calling for traditional rayon chenille. The durable core is strong and can be used on flies designed for pike, bass and saltwater species. Specially dyed to match Superfly natural materials.

DANVILLE CHENILLE

Chenille is an important material in both traditional and contemporary fly patterns. Chenille is used for body material, furled extended bodies, woven bodies and can be wrapped with multiple colors to create a striped effect. Chenille is indispensible for wooly bugger, Montana nymph, egg sucking leech and wooly worm patterns.

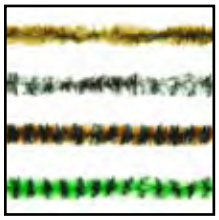
VARIEGATED CHENILLE



Variegated Chenille is a traditional rayon Chenille with alternating bands of light and dark coloration. It's great for imitating natural variations in sub-surface aquatic insects. Use it for quick, mottled bodies on various kinds of flies.

Yarn

MIDGE GILL

This supple, durable tri-lobal yarn provides subtle reflective highlights. Stillwater Solutions™ Midge Gill is ideal for duplicating the prominent white gills common to chironomid pupae.

White	SW-2405000

ANTRON® YARN

Antron® Yarn consists of a cluster of tri-lobal filaments in a strand. These filaments reflect light and capture air underwater for enhanced realism and attraction. Antron® Yarn is great for using as trailing shucks, streamer wings, parachute posts, spinner wings, tails, legs and as a body material. It can also be used to make quick and easy strike indicators.

Fl. White	ANT-12		

EGG YARN

This soft, spongy yarn is made for creating egg patterns. Colors can be combined to create two-toned patterns. The material puffs up to create a impressionistic egg. It can also be used on egg sucking leeches.

Fl. Orange	EGY-503		

ICE YARN

Ice Yarn is 2-strand yarn made up of iridescent fibers that is great for creating bodies, tails, extended bodies, spinner wings, trailing shucks and parachute posts. Ice Yarn can be brushed out to give it a buggy look. It makes an exciting substitute for traditional wool bodies on streamers. It can be furled to use as an extended body for mayfly imitations.

McFLYFOAM

McFlyfoam is designed for tying glo bugs and egg patterns for steelhead and salmon. Impregnated with color, McFlyfoam will not fade. It is quick sinking and holds its shape when submerged. The foam may also be used to tie full sculpin heads and egg sucking leeches. The bright nature of McFlyfoam also lends itself to hot colored tails.

POLYPROPYLENE

Polypropylene yarn or "Poly" can be used in place of dubbing on dry flies such as humpies and Wulff patterns. Poly is buoyant and will help keep flies riding high on the water. It is an ideal material to use for parachute posts or hopper patterns. It also makes a quick and cost-effective strike indicator.

Light Dun	S-LON-13	Yellow	S-LON-02

SUPERFIBER

SuperFiber is a great substitute for bucktail, yak hair or even polar bear on all saltwater and streamer patterns. It's much more durable than natural materials and is soft enough to undulate in the water, but stiff enough so that the fly won't lose its shape.

Black	SFBR-12	Orange	SFBR-03
Chartreuse	SFBR-18	Red	SFBR-04

SUPERHAIR

Superhair is an 11 inch long, textured, thin diameter fiber similar to natural Saltwater Yak Hair and is perfect for saltwater streamers, pike, muskie, bass and walleye flies. It works well tied as a tail, wing or belly. Light flows through the hair and shines out the tips for a fiber-optic effect. The hair flows beautifully in the water giving patterns a natural, suggestive appeal.

Synthetic Hair continued

X-STREAM FUR

X-Stream Fur makes an incredible synthetic wing on traditional hairwing streamers, saltwater, Atlantic salmon streamers, coho flies and minnow patterns. This premium craft fur has varied fiber lengths to provide a natural taper to flies, avoiding the paintbrush look. It can be cut into 1/4 inch strips and used to palmer a hook for leech patterns or cut from the backing and placed into a dubbing loop to create a low volume collar. Create barred patterns with pantone markers for more realistic imitations.

X-STREAM HAIR

X-Stream Hair is a high-volume, low-weight synthetic hair that makes a great substitute for Calf Tail, Bucktail, Saltwater Yak and other natural hair. Perfect for use as a trailing shuck or wing post on dry flies. Because it is durable, sheds water easily and is light to cast, X-Stream Hair is great for large pike, bass, bull trout and salmon streamers.

Orange	XSH-03	Yellow	XSH-02

Flash Material

SUPERFLASH

SuperFlash is a fine mylar that adds the perfect amount of sparkle and flash to any pattern. Use as an addition to hairwing patterns to add enticement or use with streamer bodies to create additional natural colors and flash. SuperFlash can be wrapped on hook shanks for great underbodies or used as a rib to provide a wide range of attactive color combinations.

LARVA LACE BODY MATERIAL

Larva Lace a is hollow, soft, pliable and stretchy body material. Because it is hollow, you can inject or thread other materials through it to create unique effects. Larva Lace can be used as ribbing, wrapped as body material or furled and used as an extended body. It makes an excellent translucent body for caddis and chironomid patterns. The lace may be marked with permanent marker to give the fly a more mottled look or natural design.

VINYL RIB

Vinyl Rib or V-Rib is a translucent ribbing material that is flat on one side and rounded on the other, allowing it to lay flat against the hook shank while creating a neat segmented body profile. It is perfect for giving streamers and nymphs distinct segments when used as ribbing. It can also be wrapped in touching wraps to create solid segmented bodies on stoneflies or wrapped with the flat side out, giving patterns a tapered body.

Foam

PRE-FORMED FOAM BODIES

Preformed Foam Bodies are available in a slim or plump profile in a wide range of colors and sizes. The bodies are easily tied to hook shanks and are ideal for creating hoppers, ant, beetles and bee patterns. They are a quick and effective way to create dry fly patterns that ride high in the water, turning any fly into an indicator fly.

BOOBY EYE/BODY FOAM

First used in England, booby flies are becoming more popular in North American fly fishing as their potential is realized by stillwater fishermen. Booby Eyes are extremely buoyant and can keep a dressed hook suspended above a full sinking line without absorbing water. Booby Foam is made from dense and durable closed-cell foam.

Body, Legs, Wings & Tailing

SUPERWEAVE MYLAR PIPING

This woven tubing creates realistic minnow bodies in a range of colors and sizes. It is made from woven pearl and metallic mylar. Simply remove the core and slide the hollow tubing over the eye of the hook and secure it at the back and front with thread. Use a marker to add realistic elements to minnows like gills, lateral lines and parr marks. It lays flat and is also highly effective when wrapped around the hook shank as a body or used as a wing case on nymph patterns.

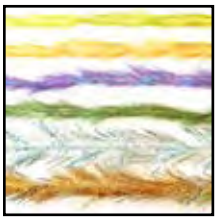
TRI-LOBAL HACKLE



Tri-Lobal Hackle is an effective blend of Tri-Lobal filaments. The fibers are on a strand resembling a feather, which can be palmered around the hook shank for full bodies or hackle. It can be used as a nymph thorax, tied in as a tail or tied matuka style. Standard Tri-Lobal Hackle is great for trout, perch and panfish patterns. Tri-Lobal filaments have been combined with pearl mylar (Crystal Tri-Lobal) and holographic mylar (Holographic Tri-Lobal) making them great for salmon, steelhead, bass, pike, muskie and saltwater targets.

Body Additions

UNIBOBBER

This 1/4 inch version of the Thingamabobber can be used as a subtle strike indicator. It's small enough to include when tying hoppers, stoneflies and other large dry fly patterns to make them highly visible and it's even buoyant enough to support tungsten beads in a hopper-dropper situation.

Assortment	TG-UB-AST	Fire Red	TG-UB-FR
Chartreuse	TG-UB-CH	White	TG-UB-WH

PETITJEAN MAGIC HEADS

Petitjean Magic Heads are another great innovation from Swiss fly tyer Marc Petitjean. They will *"change the way you fish and change the way fish react to your flies"*. The Magic Head is a soft, silicone-like cup that is tied on the hook shank during the initial tying steps. Folded back, the fly moves like a regular streamer. Flip the head forward and it changes to an effective, side-to-side, realistic, fish-catching movement. Available for hook sizes #6/0 to #14.

Sizes 01-6/0	MPH-04

THREAD, TINSEL & WIRE

All Purpose Thread

UNI-THREAD

UNI-Thread is made of continuous, slightly bonded polyester filaments. Ties flat on the hook and comes pre-waxed. UNI-thread is available in 3/0, 6/0 and 8/0 diameters.

3/0 UNI-Thread (266 denier) is a lightly bonded thread ideal for spinning deer hair, tying pike flies and saltwater flies. UNI-Thread 3/0 is available on 50 and 100 yard spools.

6/0 UNI-Thread (135 denier) is an all-purpose fly tying thread. The 6/0 diameter is perfect for tying flies in the #04 to #12 hook size range. This thread is extremely strong for its diameter and can be used for spinning deer hair. UNI-Thread 6/0 is available on 50 and 200 yard spools.

8/0 UNI-Thread (72 denier) is noted for being exceedingly strong for its thin diameter. The thread is ideal for tying small fly patterns down to size #18 and is strong enough for larger flies as well. The small diameter does not build up thread bulk and allows for greater control of fly head size. UNI-Thread 8/0 is available on 50 and 200 yard spools.

UNI-3/0 KEVLAR

Kevlar Thread builds highly durable flies and is best suited for saltwater, pike, musky and salmon patterns. 3/0 Kevlar is also a tremendously strong thread for materials which require considerable force to attach to the hook such as deer hair and bucktail. The continuous filaments lie flat on the hook, minimizing thread bulk. 200 denier.

50 YD SPOOL

Waxed Natural Yellow	ZKEV5WN

KEVLAR THREAD

Kevlar Thread builds durable flies and is best suited for flies destined to meet toothy critters like barracuda, bluefish, pike, musky and salmon. It is also a tremendously strong thread for materials that require force to attach to the hook such as deer hair and bucktail. Kevlar Thread is great for tying bucktail streamers and jigs and because it has a low stretch, it will not loosen when wet. The continuous filaments lie flat on the hook minimizing thread bulk.

50 YD SPOOL

Fine Thread

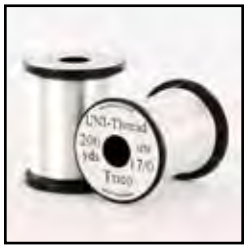
UNI-MONO

UNI-Mono is a fine (0.004 inches or 0.10 millimeters) and clear, supple monofilament thread that is perfect for using as a ribbing material, body material or even as tying thread. The monofilament is ideal for creating segmentation on scuds, stoneflies, caddis and hoppers. UNI-Mono can be used to create mono eyes for damselflies and dragonflies. It can also be wrapped over top of reflective underbodies to create highly attractive chironomid pupae and adults.

200 YD SPOOL

Fine/Clear	ZMO2FC

UNI-17/0 TRICO THREAD



UNI-Trico is an extra-fine diameter thread. At only 40 denier, UNI-Trico builds little bulk on flies and is perfect for tying flies size 20 and smaller. This fine, white, polyester thread is extremely strong for its diameter and is perfect for baetis, trico, caenis and micro caddis patterns.

200 YD SPOOL

White	Z172WH

Specialty Thread

SUPERGLITTER THREAD

Tyers of thread-bodied flies now have a whole new palette to choose from. Made from a weave of a base thread plus metallic and pearlescent filaments, this variegated flashy thread also makes an excellent ribbing material.

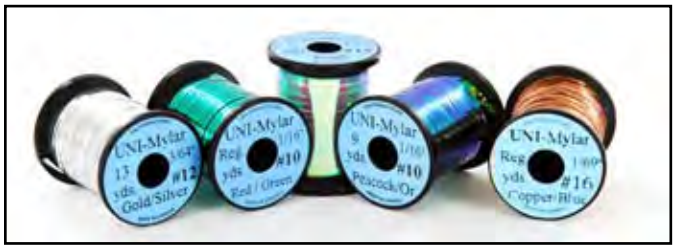
PETITJEAN SPLIT SECOND THREAD

Petitjean's Split Second Thread is a strong 8/0 thread that easily splits to create low bulk dubbing loops. Each package comes with an assortment of four spools: black, cream, grey and olive. (200 metre spools)

Split Second Thread (4 pack)	MP-THR

Tinsel

UNI-MYLAR FLAT TINSEL



UNI-Mylar has two different colored sides creating more choices carrying more spools. Mylar Tinsel can be used as a ribbing material to help reinforce fragile materials or to add flash and visual appeal to streamers. UNI-Mylar is great to use for shellbacks, wing cases, body material and ribbing.

DANVILLE FLAT MYLAR TINSEL

Flat Mylar Tinsel can be stretched slightly as it is wrapped to create a tight seamless body on streamer patterns. It can be used as a ribbing material to help reinforce fragile materials or to add flash and visual appeal to streamers. Danville's Flat Mylar Tinsel is gold on one side and silver on the other, offering choice and versatility to the tyer. Flat Mylar Tinsel also works great as a shellback or wing case on nymph patterns.

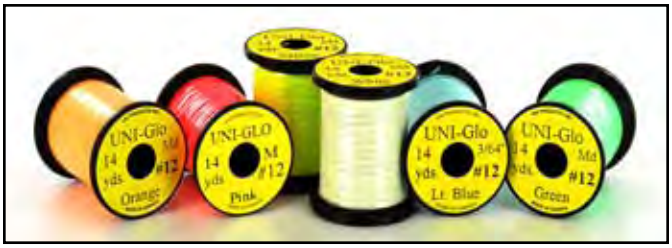
THREAD, TINSEL & WIRE

Tinsel continued

UNI-GLO



UNI-Glo is a phosphorescent, flat mylar material. It is great to use as an underbody, tag or ribbing on streamers. The flat mylar is also effective for tying slim profile chironomids. To charge the glow, simply leave the UNI-Glo under intense light for a couple minutes.

Green	ZUG12GE	Pink	ZUG12PI
Light Blue	ZUG12LB	White	ZUG12WH
Orange	ZUG12OR	Yellow	ZUG12YE
Phos. White	ZUGY7WH		

HOLOGRAPHIC MYLAR TINSEL

Holographic Mylar Tinsel is highly reflective and adds life and sparkle to any pattern. The tinsel can be added to marabou tails, wrapped as a body, used in the wing or added to wing cases and shellbacks.

UNI-FLOSS

UNI-Floss is 100% rayon all-purpose 600 denier floss. UNI-Floss lays flat and can be used to create smooth shiny bodies on flies. The floss is ideal for creating bodies and ribbing on Atlantic salmon flies, classic wet wing flies and streamers. It can also be used with microtinsels, oval tinsels and mylar tinsels to add decorative ribbing and designs to flies.

THREAD, TINSEL & WIRE

Floss continued

UNI-STRETCH

UNI-Stretch is a nylon material that is an excellent replacement for floss on streamers. It is simple to use and makes perfect tags and butts on salmon flies and streamers. The nylon is stretchy, will not separate and will not slide down the bend of the hook like regular floss. It also makes excellent underbodies for streamers, nymphs and salmon flies.

DANVILLE ACETATE FLOSS

Acetate Floss is an excellent material for tying the ultimate in durable fly bodies. Acetate Floss is often mistaken for regular floss and can be used with a bobbin to avoid some frustration. Once wrapped onto the hook shank, the floss can look stringy but after being dipped in or brushed with acetone, the body becomes hard and somewhat translucent, allowing materials and colors tied underneath to show through.

Thread Buttons

THREAD BUTTONS

Thread buttons tame unruly threads, tinsels, yarns and flosses or any other material on a spool. The button fits neatly into the holes on top of the spool and prevents materials from unravelling. Thread buttons come in packages of 6.

Thread Buttons	THB-00

Wire

SPOOLED WIRE

Superfly's top-quality wire is available in a wide range of gauges and colors to suit every fly tyer's needs. The wire is soft annealed for flexibility and is ideal for lightly weighted underbodies, ribbing or as a body material. Extra-fine wire is small enough to use as reinforcement on dry flies without affecting floatation.

Red	ZSWSRE	ZSWMRE	ZSWLRE

WORM WIRE

This thick, heavy wire is ideal for creating fast-sinking wire worms and wire buzzers and can also be used to create heavy nymph bodies and large brassie patterns.

Copper	WW-C-22	Red	WW-R-22
Silver	WW-S-22	Gold	WW-G-22

MICROTWIST

MicroTwist is a twisted 4-strand colored wire that is perfect for nymph bodies or ribbing. Use MicroTwist to create fast-sinking chironomids and buzzer patterns.

Forest Green	MICT-11
Gold	MICT-18
Silver	MICT-05

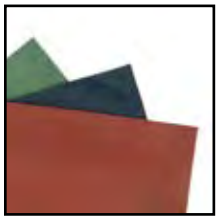
DUBBING BRUSH WIRE

Dubbing loops allow creativity to bloom, giving the tyer freedom to combine materials not possible with single-strand dubbing methods. Use wire for your dubbing loops to add a subtle internal flash, durability and weight.

Copper	DBW-00

Tungsten

TUNGSTEN SOFT SHEETS



A great alternative to lead underbodies, this non-toxic weighting material can be custom cut to fit any fly and can be smoothed and tapered with thread much faster and easier than lead wire.

Olive	TSS-08
Brown	TSS-21
Grey	TSS-34

Lead

SPOOLED LEAD

Spooled lead is a quick, convenient way to add weight to fly patterns. Lead can be wrapped around the hook shank, secured with thread and coated with SuperLaq to add weight on any fly pattern. A small amount of lead can be added behind a bead head to help keep it in place. Smaller diameter lead allows small patterns to be weighted without creating unnecessary bulk.

Size .010"	LEAD-0	Size .025"	LEAD-2-5
Size .015"	LEAD-1	Size .030"	LEAD-3
Size .020"	LEAD-2		

Weighted Eyes

BEAD CHAIN EYES

This non-toxic metal bead chain is perfect for adding big buggy eyes to patterns without adding a lot of weight to create a slow sinking pattern. They attach to the hook shank easily with a figure-eight wrap. The unique mottling provides realistic eyes on damsel and dragonfly nymphs.

BEAD HEADS

These solid brass Bead Heads feature color-coated enamel and a wide-tapered opening on one side to help the bead slide over the hook barb and around the hook shank. The other side is small enough not to slide over the hook eye. Bead Heads can be used on a variety of streamers and nymphs to help get the fly to the proper depth quickly. Use beads on patterns like the wooly bugger, pheasant tail nymph, chironomids and damsel-fly nymphs. Beads can also be strung on monofilament and used to keel the fly to ride upside down and deep.

TUNGSTEN BEAD HEADS

More environmentally friendly than lead, Tungsten Bead Heads feature a wide tapered opening on one side to help the bead to slide over the hook barb and around the hook shank. Tungsten is heavier than brass and will get a fly deeper, quicker. On faster water, Tungsten Beads help keep the fly better positioned in the strike zone.

X-Small: 3/32" for hook size 16-18
Small: 7/64" for hook size 14-16
Medium: 1/8" for hook size 12-14
Large: 5/32" for hook size 10-12

CONE HEADS

Cone Heads are constructed from solid brass and are perfect for creating sculpin, minnow and zonker patterns. They feature a counter-drilled back end to help the cone slide around the hook shank and over the hook barb, while the other side is small enough not to slide over the hook eye. Tungsten Cone Heads add weight without increasing size.

Acetone

ACETONE

Acetone is used to fuse Acetate Floss bodies on flies. A chemical reaction occurs once the Acetate Floss comes into contact with Acetone. The Acetate Floss bonds to the hook, hardens and becomes somewhat translucent. This reaction creates lifelike imitations and is great for ice flies, caddis pupae and chironomids. Comes complete with a convenient brush-on applicator.

Clear	ACET-01

Cement & Thinner

CLEARFLEX™

Dries clear and leaves a soft flexible coating. It can be used to add strength and durability in place of epoxy. Use it to coat wing quills, adding a supple natural feeling body. Wing cases and wing pads will also benefit from a light coating of Clearflex™ to enhance the natural look and feel.

Clear Cement	C-FLEX
Clear Thinner	C-FLEX-T

SUPERLAQ™

SuperLaq is a fast-penetrating, quick-drying head cement with a built in applicator in the lid. It can be added for durability at any stage of fly construction. Multiple coats can be used on the head of the fly to create a clean finish and to secure the final thread wraps and the whip finish. Available in clear and high gloss colors.

Clear	SLAQ-00	Yellow	SLAQ-008
SuperLaq Thinner	SLAQ-T		

Glue

ZAP-A-GAP

Zap-A-Gap makes an invaluable addition to any fly tying desk. Use Zap-A-Gap for setting leader knots and fly heads. It works wonderfully for adhering eyes to synthetics, hair and feathers. Zap-A-Gap adds strength to flies that need added protection from toothy critters.

Small (7 ml)	PAC-CA-7F
Medium (14 ml)	PAC-CA-14F
Large (28 ml)	PAC-CA-28F

Tying Wax

SUPERTAC WAX

Superfly's SuperTac Wax is ideal for adding bond to threads to aid in dubbing. SuperTac Wax comes in a convenient twist up tube, making application simple and streamlined. Simply apply wax to the tying thread and twist on the dubbing. No mess, no fuss.

Super Tac Wax - Regular (1/2 oz.)	S-TAC
Super Tac Wax - Small (1/8 oz.)	S-TAC-S

Dispenser Bottles

CEMENT BOTTLE WITH APPLICATORS

This simple-to-use applicator bottle is perfect for SuperLaq Head Cement. The squeezable bottle and long applicators allow for greater accuracy and control when applying cement. The bottle comes complete with a seal and two sizes of applicator tips.

Cement Bottle with Applicators	APP-01

Dye

DYE

Superfly's bottled dye is an easy to use powder dye for feathers, hair and synthetic products that sets with regular household vinegar. Dyeing fly tying materials is easy and can be quite rewarding. It allows for creative experimentation, often resulting in unique, new color combinations of materials.

Fly Hook Broach Pin

Fly Hook Broach Pins are the perfect way to turn your favorite fly pattern into something you can wear! The gold broach pin is available in 2 sizes, with a small round gold bead covering the point for safety. Tie materials onto the shank just as you would a normal hook. The pin swings away from the shank for winding thread or other materials. (1 /pkg)

Size 1/0	PIN-01S
Size 5/0	PIN-01L

Vises

PETITJEAN

SWISS VISE-MASTER

The Petijean Swiss Vise-Master lives up to its name as the most efficient vise in the fly fishing industry. It is machined from stainless steel bar stock and alloy metal to offer features not found on other vises. The Swiss Vise-Master is capable of securing hooks from a size #32 all the way up to #9/0, as well as working superbly with tube flies. The horizontal level allows bodies to be woven right in front of you. The 4 thread positions for accessory support allows you to customize your tying surroundings. The Swiss Vise-Master can be used with the included base or as a c-clamp and includes tube fly mandrels. Lifetime Guarantee.

Swiss Vise-Master	MP-V-01

HMH

SPARTAN

The HMH Spartan is an excellent value in a precision-machined vise. It features infinite head angle adjustment, ultra smooth 360 degree rotation, adjustable disc-drag rotary tension, a large easy-grip locking cam lever and a versatile interchangeable jaw system. The jaws are constructed with hardened tool grade steel. The Spartan's sleek design results in a beautiful, functional, high-quality vise. Lifetime Guarantee.

Spartan Vise-C-Clamp	H-1001C
Spartan Vise-Pedestal	H-1001P

STANDARD BENCH

The HMH Standard Bench is the vise that started the revolution in precision-machined vises. It features infinite head angle adjustment, ultra smooth 360 degree rotation, adjustable disc-drag rotary tension, a large easy-grip locking cam lever, a longer collet and tying platform for better tying and a versatile interchangeable jaw system. The jaws are constructed with hardened tool grade steel. It comes with the omni jaw, hex keys and fleece-lined pouch. Lifetime Guarantee.

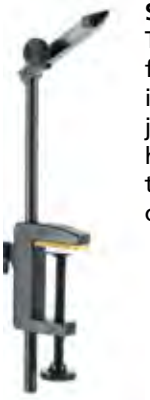
Standard Bench Vise-C-Clamp	H-1002C
Standard Bench Vise-Pedestal	H-1002P

SPINNER VISE

HMH's Spinner Vise is their first dedicated, in-line rotary tube vise. Like all HMH vises it is precision-machined from stainless steel and hard anodized aluminum, making the Spinner Vise sturdy and versatile. 1/8 inch outside diameter tubes may be placed directly into the vise jaws or mandrels may be mounted into the jaws for a wider variety of tube sizes. It features an adjustable tensioned rotation for precise control. The Spinner Vise is available in a c-clamp model and comes complete with 2 starter mandrels. Lifetime Guarantee.

Spinner Vise-C-Clamp	H-1008C

GRIFFIN



SUPERIOR 1A

The 1A is Griffin's entry model vise. The vise features a fixed head position and a solid 3/8 inch post with a height adjusting c-clamp. The jaws feature a dual knob closure to ensure hooks sit tightly. The c-clamp allows the tyer to attach the vise to any table or desk. The 1A comes with a one year warranty.

Superior 1A Vise-C-Clamp	G-V-00

SUPERIOR 2A
The Griffin 2A is a high-quality vise at an economical price. The jaws feature an adjustable angle and can be configured for left or right-handed tyers. A dual-knob closure provides hook tension from the rear or the front. The 2A is equipped with a height adjustable c-clamp to ensure a comfortable tying position. Lifetime Warranty.

Superior 2A Vise-C-Clamp G-V-01

SUPERIOR 3AR ROTARY PEDESTAL
The Griffin 3AR features a 360 degree rotary jaw with an adjustable angle that can be configured for both left and right-handed tyers. A dual knob closure provides hook tension from the rear or the front. A pedestal base is included and may be used on any flat surface. The 3AR is also equipped with a height adjustable c-clamp to ensure a comfortable tying position is achieved. Lifetime Warranty.

Superior 3AR Rotary Vise-Pedestal G-V-03

PATRIOT ROTARY VISE
Griffin considers this to be their finest vise - and many tyers agree. The tapered jaws have superior hook-holding ability and feature total hook pressure control for a wide range of hook sizes. The delrin cam lets the jaws to close very smoothly. The 360 degree rotation allows for tying at a variety of angles and the jaws can also be adjusted to various angles making this vise extremely versatile. Both c-clamp and pedestal base are included. Lifetime Warranty.

Patriot Rotary Vise G-V-05

ODYSSEY CAM
The Odyssey Cam Vise is a true rotating vise that features true centerline 360 degree rotation and offers the advantage of a cam lever. A single screw is used in the adjustment of the stainless steel jaws, making adjustment easy. The Odyssey Cam Vise will hold hooks ranging from #28 all the way up to #4/0. Lifetime Warranty.

Odyssey Cam-C-Clamp G-V-07A

ODYSSEY SPIDER VISE
The Spider Vise is a quality, entry-level vise. The Spider features true centerline 360 degree rotation with adjustable tension. The jaws feature a dual knob closure for secure hook placement. The Spider is equipped with a height adjustable c-clamp to ensure a comfortable tying position is achieved. Also included is an adjustable, post mounted bobbin cradle. Lifetime Warranty.

Odyssey Spider Vise-C-Clamp G-V-10

MONTANA MONGOOSE
The Griffin Montana Mongoose Vise is perfect for the serious tyer. It is a true centerline 360 degree rotary vise. The Mongoose comes with both a c-clamp and a pedestal base, allowing for the most versatility. The cam-operated jaws allow for quick efficient hook changes and changing hook sizes only takes a single screw adjustment. The sleek design of the Mongoose provides a comfortable position for more productive tying. The tempered steel jaws will hold hooks from size #28 right up to #4/0. The Mongoose comes complete with c-clamp, pedestal, bobbin cradle, material clip, hackle gauge, supreme bobbin and a deluxe carrying case. Lifetime Warranty.

Mongoose Vise G-V-12

SUPERFLY™ BEST VALUE

CROWN VISE
The Crown Vise features an easy to use spring lever to securely hold hooks and prevent slipping. It has a variable axis head, to adjust the angle of the vise jaws. The vise can also be adjusted to allow the jaws to rotate 360 degrees. The vise comes with a clamp that can easily be attached to any desk or table. The c-clamp also has a height adjustment to ensure comfortable tying. The heavy pedestal base comes housed in a wooden storage case.

Crown Vise-C-Clamp A-5007
Crown Vise-Pedestal Base A-5008

PREMIUM VISE
The Premium Vise is made from brass and stainless steel. The fine jaws are perfect for tying dry flies, chironomids and nymphs. The vise has a simple single lever action closure and an adjustable angle head. Also included is a spring material clip. The Premium Vise comes with a c-clamp that can easily be attached to any desk or table.

Premium Vise-C-Clamp A-5010

F.T. VISE
The F.T. Vise has fine jaws perfect for tying dry flies, chironomids and nymphs. The vise has a simple single lever action closure and an adjustable angle head. Also included is a spring material clip. The F.T. Vise comes with a clamp that can easily be attached to any desk or table.

F.T. Vise-C-Clamp A-5016

KNOB VISE
The Knob Vise is a great choice for the beginner tyer. The jaws will securely hold hooks by adjusting the knob. The Knob Vise has an adjustable angle head and an adjustable height setting. The vise comes with a handy spring material clip, hex keys and a clamp that can easily be attached to any desk or table. The c-clamp also has a height adjustment to ensure comfortable tying.

Knob Vise-C-Clamp A-5013

SUPER AA VISE
The Super AA Vise features a simple single lever action closure. The vise comes with a handy spring material clip, a clamp that can easily be attached to any desk or table and has an 8 inch post. The c-clamp also has a height adjustment to ensure comfortable tying. The Super AA is available in a chrome or black non-glare finish.

Super AA Vise-Black A-5005
Super AA Vise-Chrome A-5006

FLY KING VISE
The Fly King Vise is an easy to use vise for the beginner. The vise has an easy lever closure, and adjustable height c-clamp and fixed head position. The c-clamp also has a height adjustment to ensure comfortable tying. Available in a black finish.

Fly King Vise-C-Clamp A-5014

E-Z ROTARY VISE

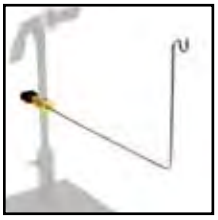
The E-Z Rotary Vise is an economical alternative for those wanting a true center-axis rotary vise. The E-Z Rotary Vise is constructed with precision-machined,stainless steel and aluminum components. The vise features adjustable rotary tension, 360 degree rotation and a screw jaw closure. The E-Z Rotary Vise is available in both c-clamp and pedestal versions. Pedestal base includes a bobbin cradle.

E-Z Rotary Vise-C-Clamp A-2001
E-Z Rotary Vise-Pedestal & C-Clamp A-2002

Vise Accessories

SUPERFLY™ BEST VALUE

BOBBIN CRADLE



This Bobbin Cradle is designed to fit any vise with a 3/8 inch post. It's used to support a thread bobbin during tying and keep it out of the way. It also comes in handy when operating a rotary vise, preventing thread build-up while the fly is in rotation.

Bobbin Cradle A-0707

MATERIAL CLIP

The Material Clip attaches easily to any tubular vise head and acts like a third hand, keeping materials clamped down and out of the way. Simply push the material into the clip to keep everything organized.

Material Clip A-1239

WASTE TOOL WITH BAG

Manage your trimmings and waste with this convenient system. The bag and frame easily attach to any standard 3/8 inch vise post to catch all unwanted material. It also acts as a safety net to help prevent the loss of small hooks and beads if dropped.

Waste Tool w/bag A-708

MIDGE JAWS

Midge Jaws fit into the jaws of most vises and allow small hooks to be mounted. The jaws give a secure hold to tiny hooks and improve access to the entire hook allowing more efficient tying. Turns any vise into a midge vise.

Midge Jaws A-8120

SPRING MATERIAL CLIP

The spring material clip acts as a third hand, keeping materials clamped down and out of the way. The spring is simple to install, and easily fits around shaft head vise models. Simply push the material into the spring to hold it firmly out of the way.

Spring Material Clip A-8615

HOOK AND HACKLE GAUGE

This lightweight Hook and Hackle Gauge is a must for any fly tyer. The gauge helps to quickly measure and select the size of hackle for tying dry flies. To use it, simply select a hackle feather and wrap it around the peg on the Hook aand Hackle Gauge. The tip of the hackle fibers will spread out on the series of rings on the gauge and will indicate size of the hackle. The Hook and Hackle Gauge has a hole on one end to allow it to be placed on the stem of the vise for instant, convenient use.

Hook & Hackle Gauge A-0311

FLAT PEDESTAL BASE

A Pedestal Base makes a vise more portable as some surfaces are too thick for standard c-clamps. This base is heavy enough to provide stability, has a sure-grip pad adhered to the bottom and allows the post of the vise to be mounted vertically or at an angle. The angled mounting option lowers the center of gravity which adds to the stability.

Flat Pedestal Base A-5026

GRIFFIN

PEDESTAL BASE

Griffin's Pedestal Base can be used with any vise having a 3/8 inch post. The base is made from heavy steel and weighs approximately 4 lbs. The base features a protective rubber pad that prevents the vise from shifting or scratching smooth surfaces. Adding a pedestal lets you tie almost anywhere.

Pedestal Base G-PED

Vise Accessories continued

COLLECT-ALL WASTEBASKET

Griffin's Collect-All Wastebasket attaches easily to the post of any vise, and comes with a thumbscrew for adjusting height on the vise post. The bag is a practical solution for keeping the tyer and tying area clean. The bag has Velcro flaps, making it simple and easy to remove and empty.

Collect-All Wastebasket G-CA

BOBBIN CRADLE

Griffin's Bobbin Cradle is designed to fit any vise with a 3/8 inch post. The cradle is used to support a thread bobbin while tying to keep it out of the tyer's way. The cradle also comes in handy when operating a rotary vise, preventing thread build-up while the fly is in rotation. The cradle comes with a 4 inch extension for customized comfort.

Bobbin Cradle G-CRA

HACKLE GAUGE

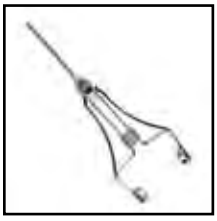
This Griffin Hackle Gauge is a must for any fly tyer. The gauge helps to quickly measure and select the size of hackle feathers for tying dry flies. To use the it, simply select a hackle feather and wrap it around the peg on the Hackle Gauge. The tip of the hackle fibers will spread out on the series of rings on the gauge and will indicate size of the hackle. The Hackle Gauge has a hole on one end to allow it to be placed on the stem of the vise for convenient use.

Hackle Gauge G-HG

Bobbins

PETITJEAN

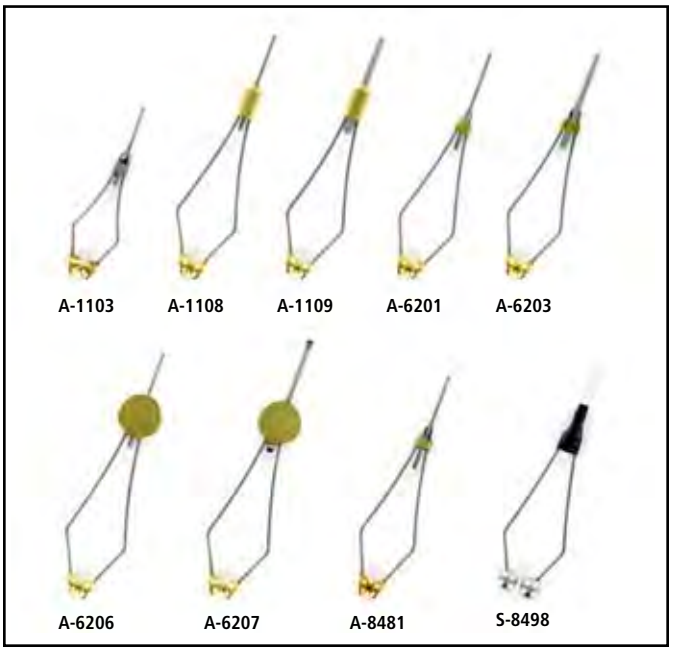
BOBBIN



Marc Petitjean has designed one of the highest-quality, most innovative tying tools ever made. Featuring a unique threading method that can be done with your eyes closed, this new bobbin is precision-machined to the most exacting standards. The adjustable thread tensioner and integral dubbing loop twister saves a lot of time on the bench.

Petitjean Bobbin MP-BOB

SUPERFLY™ BEST VALUE



There are many different styles of bobbins to choose from to hold thread, floss, wire or lead. Ceramic tipped bobbins are best for small diameter threads, while heavy tube stainless steel bobbins work well for heavy threads, wires and lead. Spools are simple to change out, but having a few extra bobbins on the bench saves you time.

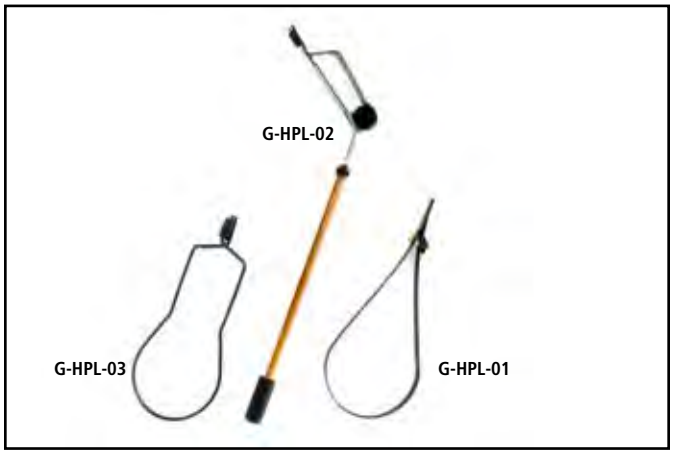
Small (Midge) Hackle Pliers	A-8322

GRIFFIN

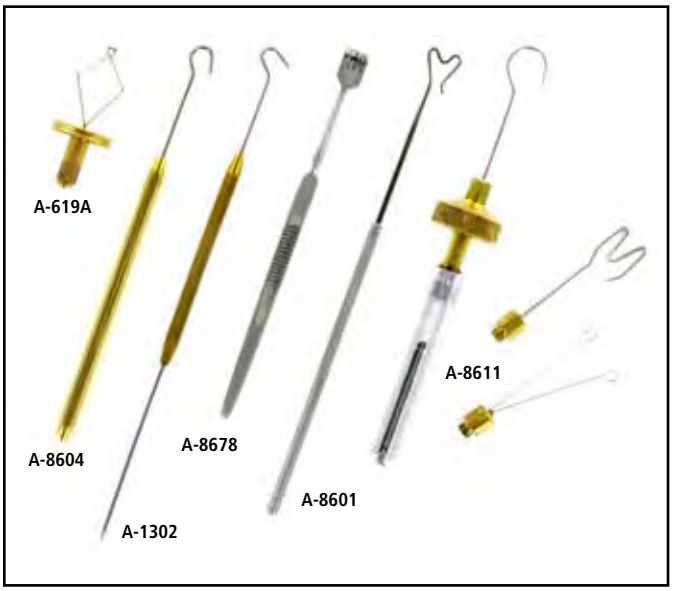


Griffin Rotating Hackle Pliers allow you to keep constant tension on the hackle while it is being wrapped, resulting in an evenly distributed wrap. The Tear Drop Hackle Pliers are constructed of high grade spring steel and have great hackle gripping power.

Regular Hackle Pliers	G-HPL-03
Rotating Hackle Pliers	G-HPL-02
Tear Drop Hackle Pliers	G-HPL-01

Dubbing Tools

SUPERFLY™ BEST VALUE



Superfly offers a range of tools to create dubbing loops, as well as tools to organize and tease out the dubbing.

Dubbing Twister	A-619A
Dubbing Hook	A-8604
Dubbing Hook with Needle	A-1302
Dubbing Teaser	A-8678
Large Aluminum Dubbing Twister	A-8601
Deluxe Dubbing Twister	A-8611
Includes two attachments.	
Dubbing Dispenser, 12 Compartment	CLM-D-TD

PETITJEAN

DUBBING TWISTER

Petitjean's Dubbing Twister has a spring locking loop tool to spin materials such as CDC or hackle. Use the dubbing twister with the Magic Tool and you've got a perfect pair. The tool also comes with an easy winding handle.

Dubbing Twister MP-DT

GRIFFIN

DUBBING TEASER

The Griffin Dubbing Teaser allows you to pick out dubbed bodies to produce spiky legs and buggier looking flies. The handle is made from nylon and has a barbed needle imbedded in the center.

Dubbing Teaser G-DTE

DUBBING TWISTER

The Griffin Dubbing Twister has a weighted base to help keep the loop closed while spinning. The Dubbing Twister is made from high quality stainless steel and brass.

Dubbing Twister G-DTW

SPINNING LOOP TOOL

The Griffin Spinning Loop Tool was designed with the help of Dr. Steve Brocco. The loop is weighted for ease of use and features a spring action that allows the loop to be opened or closed simply by raising or lowering the tool. Complete instructions included.

Spinning Loop Tool G-SLY

Whip Finishers

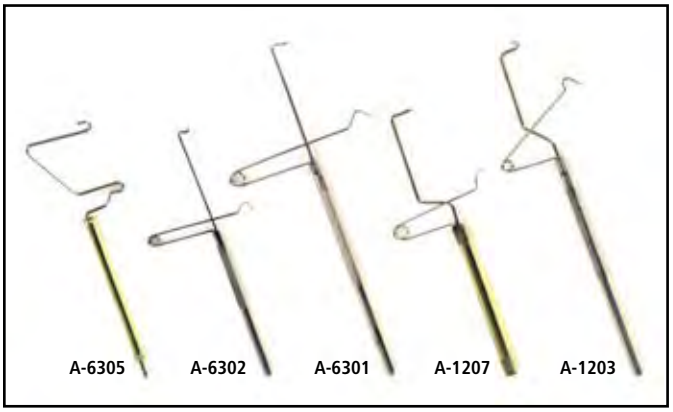
PETITJEAN

WHIP FINISHER

The Petitjean Whip Finisher easily rotates and the spring system gives allowance to tie small and precise knots.

Whip Finisher MP-WF

SUPERFLY™ BEST VALUE



A Whip Finisher is an invaluable asset to any fly tyer's bench. The tool creates a secure knot and locks thread in place. The knot is easy to learn and adds a professional and secure finish to any fly. Add SuperLaq for extra durability.

Rotating Whip Finisher - Matarelli Style	A-6305
Whip Finisher - Mini	A-6302
Whip Finisher - Standard	A-6301
Roto Whip Finisher	A-1207
Improved Whip Finisher	A-1203

GRIFFIN

NON-ROTATING WHIP FINISHER

This tool allows you to add extra wraps and still easily release the tool. The Non-Rotating Whip Finisher creates a secure knot and locks the thread in place. With the addition of SuperLaq, the knot becomes even more secure.

Non-Rotating Whip Finisher	G-WHIP-02

Hair Tools

SUPERFLY™ BEST VALUE

When working with deer, elk and moose hair, a hair stacker tool is essential for evening the hair tips. Fly patterns such as bass bugs, elk hair caddis and stimulators all benefit from using the hair stacker to give flies a professional finish. Use a small hair stacker for deer hair and a large stacker for elk and bucktail. Just clip the hair from the patch, remove any underfur and insert the hair, tip first, into the hair stacker. Knock the hair stacker on a hard surface a few times to even out the hairs. Hold the hair stacker horizontally and twist apart to reveal the evened hair.

Wooden Hair Stacker	A-1275
Standard Hair Stacker	A-8652
Hair Stacker - 4-Piece Set	A-8655
Shoehorn Hair Stacker	A-710

GRIFFIN

Griffin Hair Stackers display a distinct blue anodized base and use high quality components. Use the Regular Hair Stacker for deer and calf hair and a Large Hair Stacker for elk and bucktail.

Large Hair Stacker	G-HE-03
Regular Hair Stacker	G-HE-01
Adjustable Hair Stacker	G-HE-02

BRASSIE

HAIR PACKER

Brassie Hair Packers are innovative tools for making spun deer hair flies quickly and easily. Just squeeze the tool groove around the hook shank, push the bundle of spun hair back to compact it making room for the next stack to make denser, more buoyant flies. Once all the hair is on the shank, trim the fly to shape.

Hair Packer (8 - 1/0)	BRASS-02

Scissors

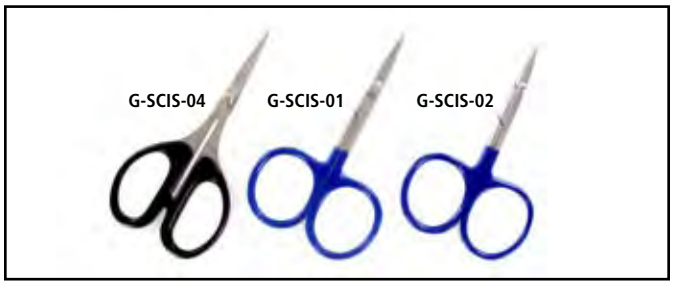
PETITJEAN

SCISSORS

Petitjean Scissors, both large and small, are extremely effective on any size project. The small scissors have a curved tip and are very effective when working on even the smallest flies. Whereas the large, straight scissors will work for every other job. The blade of the large scissors is designed to perfectly trim material in the Magic Tool with one cut.

Small Scissors	MP-SC-S
Large Scissors	MP-SC-L

GRIFFIN

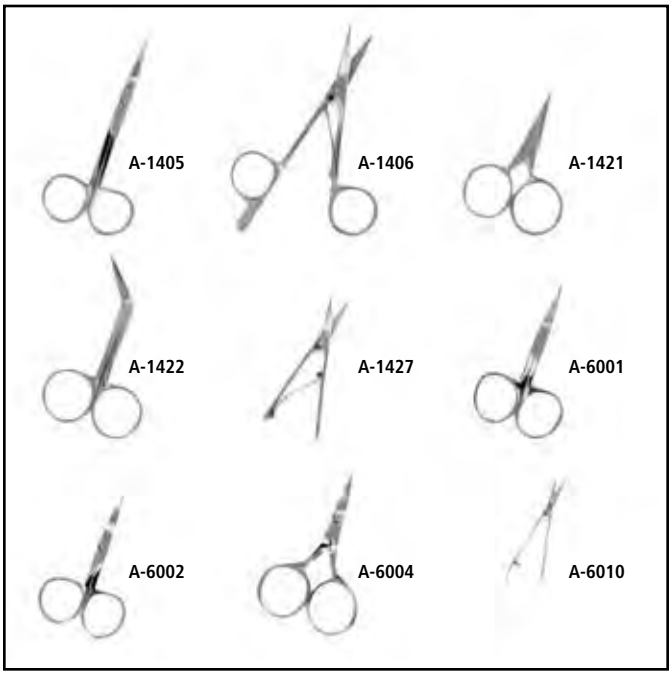


The Griffin line of scissors features blades made from high-quality stainless steel. The Arrow Point and Standard Point Scissors have a gripping serrated edge and fine points for detail work. The Griffin All-Purpose Scissors are great for cutting heavier stock materials such as stems, wires and synthetics and have plastic closed finger loops for comfort and control.

All-Purpose Scissor	G-SCIS-04
Straight Standard Point	G-SCIS-01
Straight Arrow Point	G-SCIS-02

Scissors continued

SUPERFLY™ BEST VALUE

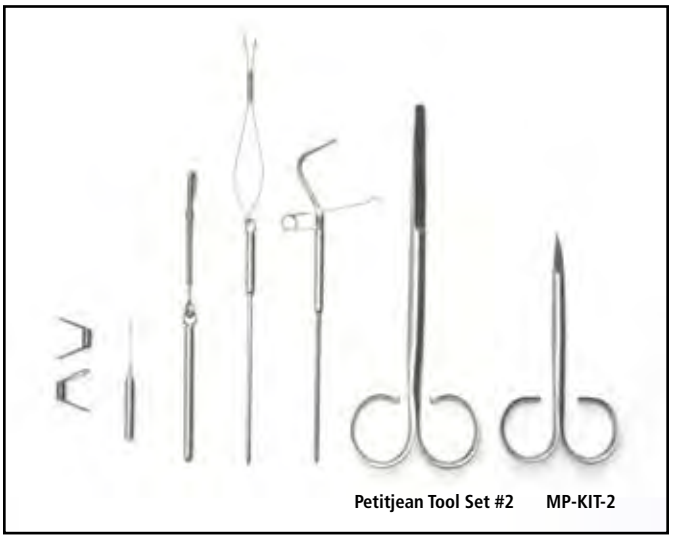


Superfly has a wide range of scissors to meet every fly tyers needs. It is a good idea to keep a set of heavy-duty scissors on hand for cutting wire, stems and hairs and to keep a set of fine tip scissors for detail work. Superfly has the right scissors for every job.

Iris Scissors	A-1405
Spring Scissors	A-1406
3" Deluxe Scissors	A-1421
Bent Scissors	A-1422
Midge Scissors	A-1427
3" Straight Scissors	A-6001
3" Curved Scissors	A-6002
3.5" Solingen Scissors	A-6004
4" Special Spring Scissors	A-6010

Specialty Tying Tools

PETITJEAN



TOOL SET #2

Petitjean's Tool Set #2 completes any fly fishers tying bench. Complete with a 2 Dubbing Loop Clamps, MP Plier, MP Twister, Long Scissors, Dubbing Needle, Whip Finisher and Small Scissors. This is a tool set that can't be passed up.

Tool Set #2	MP-KIT-2

MAGIC TOOL

The original Magic Tool is one of the hottest additions to tying and makes creating dubbing brushes with CDC, hackles, dubbing, synthetics and fur a whole new experience. The Magic Tool comes with 3 clips, 2 clamps and 3 wooden "equalizers" that can even be used for winding and cutting synthetic materials in small strands of exactly the same size. Instructions included.

Magic Tool	MP-00

MAGNUM TOOL

A plus-size Magic Tool, Petitjean's Magnum Tool is perfect for streamers and big flies for big fish. It comes with a large size clamp and clip and 3 equalizers. Instructions included.

Magnum Tool	MP-04

SUPERFLY™ BEST VALUE

HACKLE GUARDS

This set of 3 Superfly Hackle Guards have different sized holes and are easy to use. Simply slide the guard over the eye of the hook to hold back the hackle and add a whip finish knot to the fly. The guard ensures that the hackles do not get trapped down for a clean professional finish.

Hackle Guards A-1231

ENGLISH HACKLE GUARD

This hackle guard features 5 different sized holes to accommodate different sized eyes. The guard slips over the eye of the hook and keeps the hackle away from the eye so that a whip finish knot can be tied without trapping down the hackle fibers. Using a hackle guard helps to create clean, smooth, professional looking heads on any fly.

English Hackle Guard A-1232

HALF HITCH TOOL

The Half Hitch Tool lets you tie half hitch knots quickly and trouble free. It has different sized holes to allow for different sizes of eyes. To use the Half Hitch Tool, first match the hook eye to one of the tool holes. Twist the thread around the tool once, butt the tool up against the eye and slide the thread off the tool. Two tools per set.

Half Hitch Tool A-8629

WING BURNERS

Wing Burners allow the tyer to create ultra-realistic wings for mayfly, caddis and stonefly patterns. Select a matching pair of hackles and place the stems in the center of the tool. Singe the hackle fibers around the edge of the tool to create the proper shape. Made from solid brass, these tools are effective and durable.

Wing Burner - Mayfly A-8661
Wing Burner - Stonefly A-8662
Wing Burner - Caddis A-8663

WING CUTTERS

Superfly's set of 4 upright mayfly Wing Cutters are great for quick, simple and realistic fly wings. Simply press down on an oversized hackle or other winging material to reveal a perfect wing.

Wing Cutter - Set of 4 A-8665

CHROME THREADER/CLEANER

The Chrome Threader and Cleaner is two tools in one. One side of the tool is used to thread bobbins and features a wire loop long enough for any bobbin. The other side is a long stiff heavy gauge metal needle perfect for cleaning out clogged bobbins or for use as a bodkin.

Chrome Threader/Cleaner A-7007

TWEEZERS

Tweezers are a perfect addition to any fly tying bench. Use Tweezers to pick up tiny hooks and beads, hold materials in place to tie them down or to retrieve beads and hooks from containers.

4" Straight Tweezers A-8624
4" Curved Tweezers A-8625
Bead Tweezers A-8626

GRIFFIN

THREADER/CLEANERS

This package comes complete with 3 handy tools. It includes a threader made of high quality spring steel and two cleaners. One cleaner fits the fine-tube bobbins and the other cleaner fits all other bobbins.

Threader/Cleaners (set of 3) G-TC

RIVER ROAD CREATIONS

WING CUTTERS

Consistency is the hallmark of quality in fly-tying, and Wing Cutters provide unmatched consistency on all winged patterns. River Road Creations have created the finest Wing Cutters on the market today. From the durable steel blades to the Pacific Northwest hardwood handles, each cutter is a handmade work of art. Every cutter comes with a self-healing cutting pad and the complete sets also come with a custom wooden caddy.

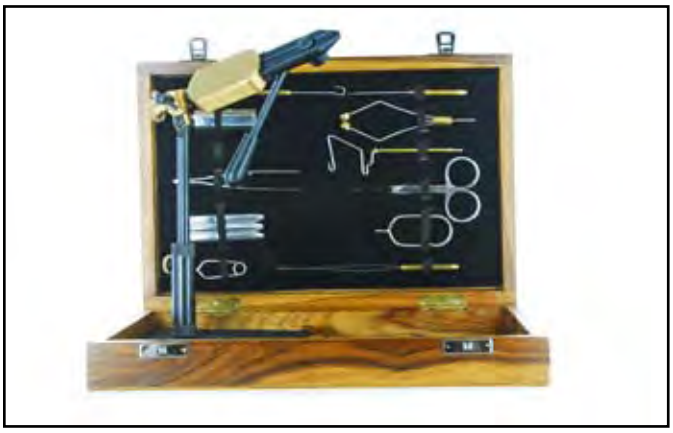
Tying Tool Kits

SUPERFLY™ BEST VALUE



CROWN VISE TOOL KIT
The Crown Vise features an easy to use spring lever to securely hold hooks and prevent slipping. The Crown Vise has a variable axis head, allowing the tyer to adjust the angle of the vise jaws. The vise may also be adjusted to allow the jaws to rotate 360 degrees. The vise comes with a pedestal base. The kit comes complete with the Crown Vise and 13 tools, all arranged in an attractive wood presentation storage box.

Crown Vise Tool Kit A-1700

Kit Contains:
- Crown Vise
- Bobbin Threader
- Bobbin
- Bodkin
- Dubbing Twister
- Hackle Pliers
- Hair Stacker
- Half Hitch Tools
- Scissors
- Tweezers
- Whip Finisher

SUPER AA VISE TOOL KIT
The Super AA Vise features a simple single lever action closure and comes with a clamp that can easily be attached to any desk or table and has an 8 inch post. The c-clamp also has a height adjustment to ensure comfortable tying. The kit comes complete with the AA Vise and six essential tools, arranged in an attractive wood presentation storage box.

Super AA Vise Tool Kit A-1720

Kit Contains:
- Super AA Vise
- Bobbin
- Bobbin Threader
- Bodkin
- Hackle Pliers
- Scissors
- Whip Finisher

STANDARD TYING TOOL KIT
The Superfly Standard Tying Tool Kit includes every tool a fly tyer needs, all conveniently housed in a zippered carrying case.

Standard Tying Tool Kit A-1750

Kit Contains:
- Bobbin
- Bobbin Threader
- Bodkin
- Hackle Pliers
- Half Hitch Tools
- Scissors
- Whip Finisher

Books

STILLWATER SOLUTIONS™ RECIPES VOLUME I: 30 PROVEN PATTERNS

by Brian Chan & Phil Rowley
BK-SW01 (SC)

In their first collaboration, stillwater experts Brian Chan & Phil Rowley let you discover the simple fly tying techniques used to make successful stillwater patterns. Stillwater Solutions™ Recipes includes fly tying instructions for 30 proven and versatile patterns covering the key food groups found in spring creeks, tailwaters and lakes throughout the season.

Features:

- Detailed step by step tying instructions with hints and techniques explained
- Traditional and non-traditional use of materials
- Entomology section with availability charts and prey characteristics
- Fishing tips, tricks and presentation tactics
- Glossary of over 90 terms
- Innovative freestanding table-top design

FLY PATTERNS FOR STILLWATERS

by Phil Rowley
BK-187 (SC)

This book explains the critical link between understanding the food base within a lake and designing effective fly patterns for these environs. It includes chironomids, scuds, mayflies, damselflies, leeches, dragonflies, caddisflies, beetles, forage fish and snails. Each chapter begins with a detailed description of the particular food item outlining its life cycle, relative importance, size, coloration and habits. Phil then provides proven patterns along with step by step tying sequences describing both materials and tying techniques.

MORRIS & CHAN ON FLY FISHING TROUT LAKES

by Skip Morris & Brian Chan
BK-162 (SC)

This book introduces the novice fly fisher to the world of stillwater (lake) fly fishing and offers more in-depth knowledge for the intermediate level angler. Topics range from reading a lake, seasons of a lake, gearing up with the right rods, reels and fly lines, fly selection and fly pattern, insect life cycles, hatch charts, fly fishing strategies, boat setup and courtesy on the water. Extensive use of color images and diagrams make this book very easy to understand and to learn from.

DVDs

STILLWATER FLY FISHING

with Brian Chan
V-67

Fisheries biologist and professional fly fisher, Brian Chan shows you his time tested methods that catch fish. This DVD combines two popular elements: step-by-step tying instructions for 11 favorite and successful stillwater flies, and the techniques used to catch fish with those same flies. It's fascinating even for the experienced fly-fisher. Brian also catches the insects his flies imitate and then shows you how to look for the signs or clues that indicate which fly to use.

TYING & FISHING STILLWATER FLIES

with Brian Chan & Jack Dennis
V-69

Acclaimed stillwater master Brian Chan opens his fly box revealing some of his favorite stillwater secrets, tips & techniques. Brian demonstrates why proper material selection is a key component in stillwater success. Brian explains a wealth of presentation techniques and tactics to use for each pattern so fly fishers know what to do with each fly the next time they venture out onto their favorite lake.

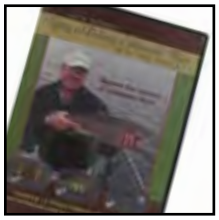
TYING FLY PATTERNS FOR STILLWATERS

with Phil Rowley
V-66

With over 20 years of professional experience, this DVD shows Phil Rowley's innovative methods for designing and tying flies. Learn how to tie 18 of Phil's best flies, from the careful selection of materials to tying the fly. Includes footage of the insects the patterns are imitating, clearly showing their anatomy in order to visually study what makes a successful fly.

TYING & FISHING STILLWATER FLIES

with Phil Rowley & Jack Dennis
V-68



Phil Rowley takes the mystery out of stillwater flies in this comprehensive DVD. Learn how to tie 12 of Phil's proven patterns and see the techniques he uses for creating and fishing them. Join Phil at the bench and discover the simple tying techniques he uses to make these patterns successful. Then head to the lake where he lets you in on some of his favorite presentation techniques and tactics when he and Jack put these patterns to the test.
